Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Objection to the Disclosure 37 CFR 1.163

The following is a quotation of section (a) of 37 CFR 1.163:

(a) The specification must contain as full and complete a disclosure as possible of the plant and the characteristics thereof that distinguish the same over related known varieties, and its antecedents, and must particularly point out where and in what manner the variety of plant has been asexually reproduced. In the case of a newly found plant, the specification must particularly point out the location and character of the area where the plant was discovered.

35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

In plant applications filed under 35 U.S.C. 161, the requirements of 35 U.S.C. are limited. The following is a quotation of 35 U.S.C. 162:

No plant patent shall be declared invalid for noncompliance with section 112 of this title if the description is as complete as is reasonably possible. The claim in the specification shall be in formal terms to the plant shown and described.

The disclosure is objected to under 37 CFR 1.163 (a) and under 35 U.S.C. 112, first paragraph, because the specification presents less than a full, clear and complete botanical description of the plant and the characteristics which define same per se and which distinguish the plant from related known cultivars and antecedents.

More specifically:

Art Unit: 1661

- A. Page 1, line 12, the recitation "at PKM Nurseries" should be deleted as such constitutes unwarranted advertising. Place of business can be cited only to point out the location where the observed plant has been discovered or asexually reproduced. MPEP 1610. Correction is required.
- B. Page 4, applicant should change the captions provided for the drawings by describing four photographic drawings instead of two and explain why the name of the plant in the caption of the drawing is 'Elizabeth Wonder' instead of '10.02.277' as described in the specification. The photographic illustrations and the specification must correspond to each other in this regard. Description of subject matter illustrated must be set forth within the body of the specification, not by photo captioning.
- C. In the interest of providing as complete a botanical description of the plant as is reasonably possible, applicants must provide more meaningful color description for the calyx with reference to the RHS Colour Chart. Correction is required.
- *
- D. In the interest of providing as complete a botanical description of the plant as is reasonably possible, applicants must provide a description of the seeds, if produced. Correction is required.
- E. Applicant should provide documentation concerning the genus and species name *Campanula X haylodgensis sensu strictu hort.* This does appear to be a proper genus and species name. It is also unclear to which cross the applicant is referring on page one, lines 3, and 16. *Campanula X haylodgensis hort.* is known in the Art whereas *Campanula X haylodgensis sensu strictu hort.* is not. *C X haylodgensis* is a cross of *C. carpatica X C. cochleariifolia*. Clarification is required.

The above listing may not be complete. Applicants should carefully compare the claimed plant with the botanical descriptions set forth in the specification to ensure completeness and accuracy and to

Art Unit: 1661

distinguish the plant within this expanding market class. Any further botanical information should be imported into the specification, as should any additional or corrected information relative to same.

Claim Rejection

35 USC § 112, 1st and 2nd Paragraphs

Claim 1 is rejected under 35 U.S.C. 112, first and second paragraphs as not being supported by a clear and complete botanical description of the plant for reasons set forth in the Objection to the Disclosure Section above.
